DESCRIPTION

1. A unit of frozen semen is defined as a single insemination dose which contains a minimum of 600 million total sperm and upon thawing $\geq 30\%$ post-thaw motility.
2. TAYLOR RIVER FARM agrees to provide detailed instructions for thawing and inseminating the frozen semen as well as consulting with the veterinarian responsible for the insemination.

INDEMNITY CLAUSE

The parties agree the BUYER(S) shall assume all responsibility for the condition of the mare and shall bear all risk of loss or damage to the mare whether by death, disease, injury, infection, or otherwise, and by any cause whatsoever, and therefore agree to hold TAYLOR RIVER FARM or any person employed by or associated with TAYLOR RIVER FARM, harmless for any and all damages associated therewith. BUYER(S) specifically understands that TAYLOR RIVER FARM makes no warranties or guarantees, expressed or implied as to the fertilizing capacity of any semen provided by TAYLOR RIVER FARM. In the event that inseminations using the standard (5) units of frozen semen from the stallion indicated do not result in a live foal, as certified by a licensed veterinarian, TAYLOR RIVER FARM will provide an additional (5) units of frozen semen from the indicated stallion for inseminations in the current year or subsequent breeding season at no additional charge (except shipping costs which again must be paid by the BUYER(S)). At this point if insemination is unsuccessful and no live foal results, TAYLOR RIVER FARM and the BUYER(S) can mutually agree upon an alternate mare for breeding for a third breeding season.
